

**No. 48198.RGB****Safety notes****WARNING!**

- Injury risk for kids! If kids or people, who cannot value the risk, handle the LED strip, there is risk of injury!
- Keep the RGB LED strip and its components away from kids. There is risk of strangulation. Do not leave package materials unattended, risk of suffocation. The LED strip is not a toy for kids!
- Use the product for its intended use only in proper way and manner. An improper use can lead to damages for the product.
- During installation the conductive lines should not be damaged or broken!
- During the installation pay attention to the correct polarity. If connected with reverse polarity the LED strip does not work and can be damaged!
- No mechanical stress should be applied to the product. Impacts or falls from even low height may damage the product!
- If the LED strip is damaged, do not use it any more!
- Do not watch directly to the LED for long time lapses!
- Strip rest pieces should only be used as described on page 2!

**Technical data:**

Operating voltage:	DC5V
Power:	18W / meter
Light angle:	120°
LED disposition:	60LEDs / meter
LED Type:	SMD5050 with WS2812 addressable
Operating temperature:	-20°C~45°C
Package content:	0.45 meter

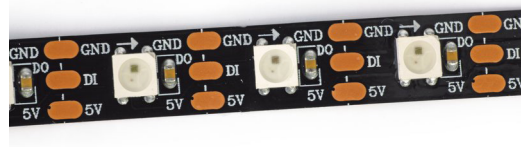

Addressable LEDs with WS2812 via flight control boards with PIN LED like 48373.xx and 48374.xxx and 48377.xxx addressable.

Self-adhesive backing with 3M double-sided adhesive tape

Can be shortened at the cutting mark

**Use information:**

The LED strips are connected to the FCs:

- GND to GND
- DI to LED
- 5V DC and 5V DC

Additional LED strips can be connected with DI and DO of the first connected LED strip. Further data sheets for the WS2812 can be found on the internet.
